Using Quarto to Generate Documents in APA Style (7th Edition)

Ana Fulano   Blanca Zutano   Carina Mengano   true

This document is a template demonstrating the apaquarto format.

This is my introductory paragraph. The title will be placed above it automatically. *Do not start with an introductory heading* (e.g., "Introduction"). The title acts as your Level 1 heading for the introduction.

Details about writing headings with markdown in APA style are [here](#).

Displaying Figures

A reference label for a figure must have the prefix `fig-`, and in a code chunk, the caption must be set with `fig-cap`. Captions are in [title case](#).

To refer to any figure or table, use the `@` symbol followed by the reference label (e.g., **?@fig-myplot**).

Imported Graphics

One way to import an existing graphic as a figure is to use `knitr::include_graphics` in a code chunk. For example, **?@fig-import1** is an imported image. Note that in apaquarto-pdf documents, we can specify that that a figure or table should span both columns when in journal mode by setting the `apa-twocolumn` chunk option to `true`. For other formats, this distinction does not matter.

Figure graphics can be imported directly with Markdown, as with Figure **??**.

Which style of creating figures you choose depends on preference and need.
